EDUCATION

Chandigarh University
Bachelors Of Computer Applications (BCA) (CGPA:8.4)   *Graduation Date: July 2025*

WORK EXPERIENCE

DIFM.tech   **Online**
Front-End Developer (Intern)   *June 2023-August*

- Conducted comprehensive site review, identifying areas for wireframing and redesign.
- Contributed to 60% site overhaul, enhancing user experience and modern design.
- Proficient in Bootstrap, minimizing reliance on raw CSS for streamlined development
- Advanced skills in jQuery, enhancing site functionality and interactivity.
- Applied critical thinking to create detailed reports for strategic redesign approach.
- Learned and applied WordPress, creating new pages in open-source project.
- Developed technical skills in WordPress within real-world environment.
- Committed to continuous learning, adapting to new technologies and methodologies.

DIFM.tech   **Online**
Technical Article Writer (Intern)   *Feb 2023- June*

- Crafted engaging articles on space and environmental topics, showcasing expertise and language proficiency.
- Collaborated effectively within the article writing group, refining colleagues' writing styles and enhancing article quality.
- Demonstrated commitment to improvement through active participation in discussions and staying updated on relevant topics.

PROJECTS

Portfolio: [Link]
- Built Using: HTML, CSS, Bootstrap, JavaScript, jQuery.
- Designed to showcase skills and expertise in web development.
- Implemented responsive design for optimal viewing across devices.
- Incorporated interactive elements to engage users and highlight projects.
- Ensured seamless navigation and user experience through intuitive layout.
- Integrated modern design principles to enhance visual appeal and professionalism.
- Utilized front-end technologies to develop a dynamic and visually appealing portfolio.

Weather Application: **[Link]**
- Developed a user-friendly web application called the Weather App utilizing JavaScript, HTML, and CSS to provide accurate weather information for any city or location.
- Implemented a built-in search bar feature that allows users to easily search for weather updates.
- Incorporated a standout feature that dynamically changes the background image based on the current weather conditions, enhancing the visual experience for users.
- Created an intuitive interface for quick access to weather forecasts, making it a convenient tool for everyday use.
- Leveraged weather APIs to fetch real-time weather data, ensuring accuracy and reliability in weather updates.
- Utilized JavaScript to integrate API calls seamlessly into the Weather App, enabling it to retrieve current weather information for any location

Celestial Gallery: [Link]
- Built Using: HTML, CSS, Bootstrap, JavaScript, jQuery.
- Users compile lists of favourite space events or galaxies.
- Lists seamlessly transform into visually appealing cards.
- Allows user-inserted images for personalized experience.
- Offers a journey through space exploration.

Text Editor: [Link]
- Built Using: JavaScript, CSS, HTML, Bootstrap.
- Seamlessly toggles between light and dark modes.
- Offers a streamlined interface with intuitive navigation, facilitating efficient writing and task management.
- Enhances productivity with distraction-free writing experience.

Stopwatch: [Link]
- Built Using: HTML, CSS, JavaScript, jQuery.
- User-friendly interface for effortless timer control.
- Features start, pause, and reset functionalities.
- Provides accurate timekeeping for various activities.
- Minimalist design ensures a seamless user experience.

Speed Of Light Tracker: - [Link]
- Built Using: HTML, CSS, Bootstrap, JavaScript, jQuery.
- Calculates distance travelled by light over a user-defined timeframe.
- Instantly computes distance covered based on input years.
- Educational tool showcasing vast distances light can travel over time.

SKILLS

- Javascript, Jquery, Bootstrap, Figma, Vs Code, Html5, CSS3, APIs, Modern design, Responsive design, User experience (UX), Visual appeal.
